Tiveo

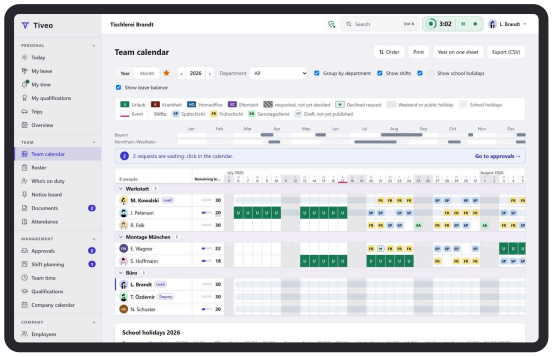

A PROPOSAL FOR OUR BUSINESS

PROPOSED BY

DATE

Leave, hours and shifts in one system

Leave slips, the Excel list and the wall calendar can go. Staff request leave and clock in on their phones, managers approve, Tiveo does the maths.

What it brings us

- Everyone sees their own leave and hours and asks less often.
- Tiveo calculates holidays, part-time and remaining leave, showing where each figure comes from.
- Requests, team calendar and roster sit in one system and work together.

What Tiveo does

Core features: What every company needs: people with and without accounts, structure and roles, public holidays, notice board, documents, data protection and export.

Time recording: Record working time in the browser, on the phone or at a terminal, with a time account, Working Time Act checks, a payroll export and project hours if you wish.

Qualifications: Safety briefings, first aiders and training points: who has what, and what runs out soon.

Absences: Request and approve leave, calculate remaining leave and part-time, with sick leave and every other absence in one calendar.

Shift planning: Rosters with demand, a check before publishing, open shifts, swaps and checklists, linked to leave and hours.

Vehicle logbook: In beta: start trips the way you clock in, with an unbroken odometer chain and every change visible, plus costs and mileage allowance.

What it costs

Plan	Free	Team	Business	Company
Employees	up to 5	up to 15	up to 50	up to 100
Price per month	€0	€19	€59	€119

Absences and shift planning come with every plan, the other modules from Team. You pay by headcount, and up to 5 it's free. Net price, cancellable at the end of any paid month.

Try it free for a month

Data protection and works council

- Hosted in Germany: Servers in Nuremberg and Munich
- Data processing agreement under Art. 28 GDPR to download, no request needed
- Sample works agreement as a Word file to edit

tiveo.de/en/sicherheit

How we introduce it

1. **Map the structure**
   Departments, teams and sites with their heads. The site decides the public holidays.
2. **Bring in people**
   Add, invite or import them from a CSV or the Excel leave planner's workbook.
3. **Choose modules**
   Switch on time recording, shift planning, qualifications or the vehicle logbook from a date. A list shows what is still missing; switching off deletes nothing.

Look first, then decide

See the demo

The demo shows Tiveo with sample data, no sign-up.
